Technical parameters

Version

Swirling anemostats with fixed blades.

Construction

Anemostats are made of steel sheet with white firing paint (RAL 9010).

Installation

Anemostats are intended for installation in the ceiling for air supply and exhaust. Installation height 2.8–4.6 m.

Mounting

using the screws located on the neck of the anemostat.

Accessories

Plenum boxes made of galvanized steel, standard or insulated, optionally with regulating flap or perforated sheet.

Type key for ordering

whirling anemostat

DRE-E 125 R

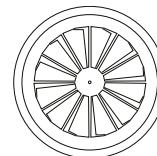

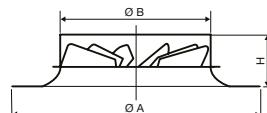

1 2

1 – anemostat size

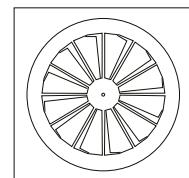

2 – implementation

R – circular panel

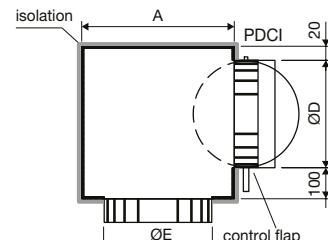

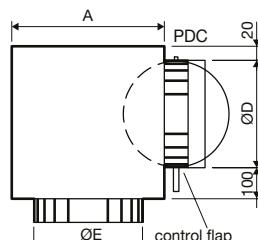

S – square panel 595x595 mm

Quick Design Table

Explanatory notes:

- Q [m³/h] air flow
 A_k [m²] free discharge area
 Δp_t [Pa] total pressure drop
 L_{WA} [dB(A)] acoustic performance
 X_{0,25} [m] air flow range to obtain a comfortable air speed in the living area under isothermal conditions of 0.25 m/s
