

Technical parameters

- mobile air purifier with quiet operation and high filtration efficiency, suitable for rooms up to 50 m²
- integrated touch LCD controller
- remote control
- UV light
- integrated timer that ensures automatic shutdown after 1 to 8 hours
- filter change indication
- 3-stage filtration
- automatic shut-off in case of accidental tipping

- **LCD remote control**
 - colour graded air quality level indication
 - PM2.5 indicator (µg/m³)
 - relative humidity level display
 - room temperature display
 - display of set time
 - filter change display
 - screen lock

- HEPA filter (class H13) removes larger particles (PM2.5) such as pollen, spores, dust, dust mites, bacteria and viruses
- activated carbon filter adsorbs fumes, odours, vapours, aromatic and volatile organic chemical compounds.

- **Filtration**
 - cylindrical filters with 360° range and 99.99% efficiency
 - glass fibre pre-filter (class F7) removes larger particles (PM10)

- **Settings**
 - manual mode – 3 speeds
 - SMART mode – adjusts fan speed depending on air quality
 - night mode – operation with reduced noise level
 - timer – programmable from 1 to 8 hours
