

## Cuffs, grilles, suction nozzles

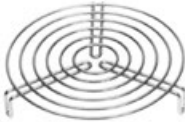

### VBM – connecting cuff

- for circular duct fans
- allows you to connect or disconnect the fan for maintenance and cleaning
- it is made of galvanized steel with a rubber lining, the lining dampens possible vibrations and noise very well
- the clip is tightened with two screws
- clips are used to connect MIXVENT-TD, RK, RM-N fans with pipes or other air-conditioning devices, such as filters, heaters, etc.
- other sizes on request

<b>VBM</b>	100	125	150	160	200	250	315	355	400	450	500	630	710	800
<b>Ø D [mm]</b>	100	125	150	160	200	250	315	355	400	450	500	630	710	800
<b>L [mm]</b>	65	65	65	65	65	65	65	65	65	65	65	65	65	65

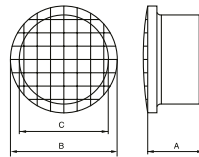

### SG – protective grill

- serves as protection against touching and intrusion of foreign bodies into the fan. Mounted on suction or discharge.
- for circular duct fans
- is made of galvanized steel, black version from size 355
- grills are attached with self-tapping screws
- they are used for fans MIXVENT-TD, RK, RM-N

<b>SG</b>	100	125	150	160	200	250	315	355	400	450	500	630
<b>Ø D [mm]</b>	100	125	150	160	200	250	315	355	400	450	500	630

### MRJ – protective grill with nozzle

- serves as protection against touching and intrusion of foreign bodies into the fan. Mounted on suction or discharge.
